You Too Can Have Younger Looking Skin.

HAVE YOU BEEN seeking the beauty and radiance of younger looking skin? Look no further than 633 Ray of Beauty, skin care consultants who provide Lumière, and ultramodern skin care program that Europeans have been enjoying for years.

Long recognized in the European medical community and rapidly gaining acceptance with doctors in the United States, Light Emitting Diode – Light Therapy has now emerged at the forefront of salon technology. Lumière combines light therapy with topical skincare products and dietary supplements to offer the first complete, naturally advanced skincare regime for facial rejuvenation. Safe, convenient and clinically proven, Lumière works with the body's own natural processes to counteract the effects of chronological and photo-aging.

Lumière is the safest, most convenient, and effective means to deliver facial rejuvenation. The patented Lumière Photo-Thérapie device uses an array of carefully arranged LEDs to deliver pure, uniform, narrowband red light and works with Lumière Topical Skincare to activate a series of responses in the skin that convert light energy into the cellular building blocks required by the body. It's less invasive than microderm abrasion or chemical peels, and achieves the same results. **G**

For a consultation, please call 352-380- 0744, and learn more about our technology at www.pathwaytobeauty.com. Joseph or Diego will be happy to answer any questions. 4127-A 16th Boulevard, in the Millhopper Square, (two doors East of Leonardo's)
