News Headlines from:

CARLSBAD, Calif., July 20 /PRNewswire/ -- Today's major advances in light therapy are both significant and scientifically proven, like the non-invasive Lumiere Light Therapie system that effectively counteracts the effects of aging with a 20-minute spa treatment.

Leading spas and salons can now offer their clients a comfortable alternative to the more aggressive and invasive facial rejuvenation techniques such as microdermabrasion, laser and chemical peels that can often be painful and cause initial redness and swelling, according to Anthony Case, President of Lumiere Light Therapie (<http://www.lumierelight.com>).

"Efficient light therapy is all-natural anti-aging and is completely non-invasive, non-thermal, and non-laser. In fact, the FDA review of Lumiere Light Therapie's process declared it 'poses no risk' to clients," says Case.

Lumiere Light Therapie's narrow band LED -- light emitting diode -- stimulates skin cells to produce collagen and elastin, important cellular components of younger looking and feeling skin.

The device works in concert with specially formulated topical skincare products to help clear and soothe problematic skin. It evens out skin tone and texture, lightens age spots, sun spots and dark circles. It also diminishes crow's feet and tightens thin, sagging skin to remove fine lines and reduce wrinkles.

The Lumiere Light Therapie device has the endorsement of a number of the country's leading board-certified dermatologists and cosmetic surgeons such as anti-aging guru Dr. Neil Sadick in Manhattan.

Respected salons and spas around the country now offer this newest skin care service as well and report that clients are 'in love with the light' and the youthful appearance that just one luxurious 20-minute treatment immediately shows them.

For more information go to <http://www.lumierelight.com> or call 866-724-8267 to find the spa or salon nearest you.
